

# VALLEY BOX SOLUTIONS

# CORROSION

# PREVENTION

A Parts Distribution Warehouse needed to decrease their 13% corrosion rate on all stored parts.

The company required a product that would remove the corrosion that had taken place, as well as prevent future corrosion. At the forefront were their concerns about their product's multiple metals, sensitive electronics and mechanical components.

Valley Box Field Technicians recommended the use of...

## Zerust®

[a corrosion inhibiting product]

## Vapor Barrier Bags

[Custom Bags, Air Evacuated & Heat Sealed]

The Vendor Surveillance Program kept the Parts Company stocked with:

- ☒ emitters
- ☒ desiccants
- ☒ humidity indicators
- ☒ gusseted barrier bags

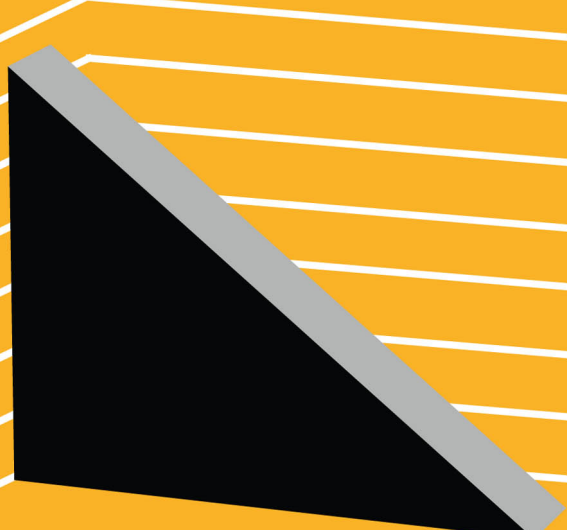

### TESTIMONIAL

Shipping Coordinator  
Parts Distribution Warehouse

The [Valley Box's crew is] also able to support emergency needs without effecting the support in our other areas
